

AARENET IS THE COMPETENT AND FLEXIBLE PROVIDER FOR VOICE-OVER-IP/VOIP SERVICES

The Swiss company is a specialized and high-quality provider of VoIP services and equipment for the communications industry in the IP market. The systems and services of Aarenet are offered to Telecom Service Provider (TSP), Internet Service Providers (ISP), City Carriers, Cable TV Companies, Utilities and Enterprises. Based on a modular architecture Aarenet delivers turn-key systems or managed services designed to the customer's needs. Systems and services are custom designed, implemented on time, deployed in excellent quality and operated in highest availability.

The core element of the VoIP solution is the Aarenet VoIP Switch entirely developed by Aarenet. The Aarenet VoIP Switch is a Class 5 VoIP soft switch with additional PBX/Centrex functionalities that offers telephony services to private subscribers and end-users in enterprises. Its technical design, quality of service and features are second to none in its range of pricing.

In the own operated Network Operations Center (NOC) all operational necessary parameters of managed customer systems are monitored around the clock with the focus to automate the monitoring process in favour of the customer. Automated alerts support Aarenet's staff in the NOC to control and manage tasks according to their priorities. Aarenet network specialists may intervene in the configurations of the customer systems to ensure a smooth calling operation as needed and to guarantee continued operation of the monitored systems. The specialists of Aarenet are well skilled and experienced to operate and maintain Carrier-Switches according to the requirements of the customers. Customers relying on Managed Services deployed by Aarenet may transfer mission critical tasks to Aarenet to minimize their risks and problems in systems operations. Aarenet offers various Service Level Agreements to customers including full 24/7 support and free of charge system software upgrades.

AARENET AG, MERIEDWEG 11
3172 NIEDERWANGEN, SWITZERLAND

NETWORK OPERATIONS CENTER

Aarenet was founded in 2004 by members of the management team and members of the board. The headquarters are located in Niederwangen, at the westside city boarder of Berne, the Capital of Switzerland. A full operational regional NOC and operations team in Ho-Chi-Min-City, Vietnam, supports the SEA customers locally to ensure a round the clock service availability.

The systems and services from Aarenet are available and serviced in several European Countries and in selected markets in South-East Asia. Many systems are operational at reputational carriers, city councils and utility providers in the targeted markets. References and information available upon request.
