3 COURSE REQUIREMENTS

- ▶ List of suitable SIP Phones that are supported by the anSwitch V7 Phone provisioning feature:

Phone Manufacturer	Phone Types	Manufacturer Redirection Service	Remark
Grandstream	GRP2612, GRP2613, GRP2614, GRP2615 GPX1615, GPX1625, GPX1628, GPX2130, GPX2135, GPX2140, GPX2160, GPX2170	Supported	
SNOM	D315, D335, D385, D715, D717, D735, D785	Supported	
Yealink	T21P E2, T40G, T53W, T54W, T57W	Supported	

Note

The trainees must make sure to have at least 2 SIP phones of this phone list and 1 iOS or Android cell phone at hand for the exercises.

➔ The best exercise experience is achieved with 5 phones per trainee.

Note

If exactly one of the above types is not available, newer types of SIP phones from one of the three manufacturers might work.

If you are not using a phone type of the list above, the experience shows that there might be problems with the configuration of phone key features. This may affect your success in the training exercises.
